Here is the RLSO version of the RAOs, updated in the four locations we discussed. I also updated one spot where it appears the post-ORC editing left a word incomplete. Let me know if you think this needs any more massaging before being shown tomorrow. I don't think I captured the edit to the sentence describing use of the pre-design sampling data necessarily verbatim, but got the spirit of it.

Thanks,
Andy

Subject: For our call

We had a brief call with the CPG about the RAOs and Michael had a few thoughts for our call at 1 as far as the RAOs that I wanted to give you a heads up on:

1. We need to be able show how we can tie the RAO discussion to the CSTAG recommendations.
2. CPG thinks there is too much detail in RAO discussion, if we agree perhaps some of it can fit somewhere else in the FS?
3. We'd like to work on the RAOs real time tomorrow and if we can come up with a pretty good consensus, we will share them with headquarters (CSTAG and some from NRRB) as a heads up in the next week or so.
